

AMAZING QUICKFEED

RYEGRASS & CLOVER BLENDS, V-SERIES BLENDS

- Combines improved winter activity plus late season maturity to boost total feed production.
- Improved heat tolerance, can be sown early in Autumn
- Makes excellent Hay or Silage
- Excellent option for oversowing into degraded flood affected perennial pastures or oversowing into Setaria and Kikuyu
- Strong rust resistance
- Suitable for livestock: Beef, Sheep & Dairy.

Amazing Quick Feed blend is a blend of Amazon T Tetraploid Annual Ryegrass and Achieve Diploid Italian Ryegrass. It has strong rust resistance, great for grazing and beautiful quality hay and silage. It's a great option for over-sowing into Setaria and Kikuyu and degraded flood affected pastures.

Seed Mixture By Count:

- 60% Amazon T - Annual Ryegrass
- 40% Achieve - Italian Ryegrass

Rainfall:

450mm+

Sowing Rates:

Dryland 15-20kg/ha, Irrigation/High Rainfall 25-30kg/ha

Paddock preparations:

Can be direct drilled or sown into a cultivated seedbed. Can be oversown into existing pasture sward. Cultivate seed bed if the ground is uneven.

Sowing depth:

Shallow (10-15mm), using a roller will ensure good seed-soil contact and improve germination rates.

Weed control:

A weed-free seedbed allows for better establishment results. The use of herbicides prior to sowing can alleviate competition from weeds. Speak to your local agronomist for herbicide recommendations.

Fertiliser :

The use of fertiliser at sowing will improve the establishment and yield of pasture.

Grazing management:

Pasture should not be grazed until adequately anchored (can not be pulled out easily). Ryegrass is better suited to rotational grazing, allowing plants to re-grow to the 2-3 leaf stage before grazing again.
