

BEEF & SHEEP

DEEP ROOTED PERENNIAL, V-SERIES BLENDS

- Deep rooted perennial blend with regenerating clovers

Multi-purpose deep rooted perennial blend. Cool season production with late spring function. Suits all livestock classes.

Seed Mixture By Count:

40% Amplify Phalaris
20% Dunstan Diploid Perennial Ryegrass (Nil Endophyte)
16% Riverina Clover (Yanninicum)
16% Goulburn Clover (Sub)
8% Yarck Cocksfoot (Continental)

Rainfall:

400mm+

Sowing Rate:

8-15kg/ha

Paddock preparations:

Can be direct drilled or sown into a cultivated seedbed. Can be oversown into existing pasture sward. Cultivate seed bed if the ground is uneven.

Sowing depth:

Shallow (10-15mm), using a roller will ensure good seed-soil contact and improve germination rates.

Weed control:

A weed-free seedbed allows for better establishment results. The use of herbicides prior to sowing can alleviate competition from weeds. Speak to your local agronomist for herbicide recommendations.

Fertiliser:

Use soil testing to plan your fertiliser needs. Drilling with a starter fertiliser gives seedlings immediate access to nutrients to achieve great winter growth. Yields will be further improved by applications of nitrogen.

Grazing management:

Pasture should not be grazed until adequately anchored (can not be pulled out easily). Ryegrass is better suited to rotational grazing, allowing plants to re-grow to the 2-3 leaf stage before grazing again.
