

DUNSTAN

PERENNIAL RYEGRASS

Dunstan is a dark leaf perennial ryegrass with excellent seasonal growth. Performs well under heavy wear.

Features:

Dunstan Perennial Ryegrass is an Australian breed variety and new to our landscape range.

Selected for its persistence and quick germination Dunstan will provide a dark leaf dense turf surface with excellent seasonal growth.

Dunstan will sustain under minimal rainfall and will thrive under irrigation, perform well under heavy wear.

Dunstan is an ideal replacement to Victorian perennial due to its improved persistence and disease resistance.

Dunstan is ideal for use in the grassing reinstatement of construction sites, industrial areas, parklands and use on racetracks.

Seeding Rates:

Seedling germination can be expected in 5 to 7 days after sowing. For best results, a seeding rate of 3-4kg/100m² is recommended.

Quick Facts

- Perennial ryegrass
- Diploid
- Mid maturity
- Rainfall 600mm+ or irrigation
- Nil/low endophyte
