

EQUIPASTURE 450+

DEEP ROOTED PERENNIAL, V-SERIES BLENDS

- Balanced Equine blend with a good mix of hardy species that work well in the equine space.

Developed specifically for horses and alpacas in regions of lower rainfall. Hardwearing and persistent, will respond to rainfall in warmer.

Seed Mixture By Count:

- 30% Continental VNS Tall Fescue
- 30% Mediterranean VNS Tall Fescue
- 16% Matua Prairie Grass
- 8% Palestine Clover (Strawberry)
- 8% Yarck Cocksfoot (Continental)
- 4% Kentucky Bluegrass
- 4% Creeping Red Fine Fescue

Rainfall:

450mm+

Sowing Rates:

25kg/ha

Paddock preparations:

Can be direct drilled or sown into a cultivated seedbed. Can be oversown into existing pasture sward. Cultivate seed bed if the ground is uneven.

Sowing depth:

Shallow (10-15mm), using a roller will ensure good seed-soil contact and improve germination rates.

Weed control:

A weed-free seedbed allows for better establishment results. The use of herbicides prior to sowing can alleviate competition from weeds. Speak to your local agronomist for herbicide recommendations.

Fertiliser :

The use of fertiliser at sowing will improve the establishment and yield of pasture.

Grazing management :

Pasture should not be grazed until adequately anchored (can not be pulled out easily). Ryegrass is better suited to rotational grazing, allowing plants to re-grow to the 2-3 leaf stage before grazing again.
