

HOME STRAIGHT SEED BLEND

For Professional Race Tracks.

Home Straight is a blend of two Tetraploid Annual Ryegrass, specifically designed for winter oversow into warm season turf (Kikuyu / Couch).

Tetraploid Ryegrass has larger seed which germinates fast and has a larger root system than a Diploid. Home Straight blend provides excellent winter growth with good colour to provide an excellent winter cover protecting your warm season surface.

Seed Mixture By Count:

- 100% Annual Tetraploid Ryegrass

Characteristics:

- Fast germination
- Excellent winter growth
- Good colour and density
- No Endophyte

Sowing Rates:

Sowing rate range 100kg - 150kg per hectare.

Home Straight blend is suitable for all warm season oversowing and will transition out well in summer although for best results should be sprayed out with herbicide in spring or early Summer.
