

# POA TRIV

**Poa trivialis thrives under cool, humid and shady conditions. It is grown under many climatic conditions. It is normally used in mixtures with other species like Poa pratensis and red fescue. Poa trivialis tolerates lower mowing heights than Poa pratensis because it is a bunch-growing grass**

## Features:

- Fine overall impression
- High shade tolerance
- Good frost tolerance
- Erect growth habit

## Sowing Rate:

- New Seeding: 3-5/100sqm

## Areas Of Use:

- Improved Putting Surface

## MAINTENANCE:

DASAS has an erect growth habit which is a great advantage in overseeding of golf greens. It allows a low cutting height and a good straight ball run.
