

VS DRYMASTER SF

DEEP ROOTED PERENNIAL, V-SERIES BLENDS

- Acid tolerant
- Cool season & spring production
- Suitable for Horses

Suited to challenging environments. Acid tolerant. Cool season & spring production. Suitable for Horses.

Seed Mixture By Count:

- 60% Dunstan Diploid Perennial Ryegrass (Nil Endophyte)
- 22% Riverina Clover (Yanninicum)
- 10% Safeguard Annual Diploid Ryegrass
- 8% Yarck Cocksfoot (Continental)

Rainfall:

450mm+

Sowing Rates:

10-15kg/ha

Paddock preparations:

Can be direct drilled or sown into a cultivated seedbed. Can be oversown into existing pasture sward. Cultivate seed bed if the ground is uneven.

Sowing depth:

Shallow (10-15mm), using a roller will ensure good seed-soil contact and improve germination rates.

Weed control:

A weed-free seedbed allows for better establishment results. The use of herbicides prior to sowing can alleviate competition from weeds. Speak to your local agronomist for herbicide recommendations.

Fertiliser :

The use of fertiliser at sowing will improve the establishment and yield of pasture.

Grazing management :

Pasture should not be grazed until adequately anchored (can not be pulled out easily). Ryegrass is better suited to rotational grazing, allowing plants to re-grow to the 2-3 leaf stage before grazing again.
